

CABS

SIMPLIFYING THE PROCESS OF CARRIER ACCESS BILLING

Maximize your access revenues with a flexible, accurate, and efficient solution.

Working in conjunction with our iCommVergence™ billing and OSS system or on its own, CommSoft's CABS product is easily configured to accurately administer ALL of your access revenue agreements, carrier billing, and payments.

CABS is a user-friendly, SECAB/MECAB compliant system that provides data collection/exchange for switched and special access. Our software ensures that this critical operation is administered accurately to maximize revenue.

Our CABS product is flexible enough to accommodate the vast array of possible interconnection agreements and network configurations, including reciprocal compensation.

Process all feature group types, transit traffic, and CMRS traffic all within the system. CommSoft's CABS also provides multi-tandem support at the exchange level.

COMPLETE, EASY TO USE, PROVEN SOFTWARE

CommSoft's CABS product is a releaseable application that is updated bi-annually with new functionality and features. All releases go through proven testing and QA procedures. The fully documented system is table-driven, allowing flexibility in managing tariffs and agreements.

The browser-based user interface utilizes field prompts, drop-down fields, and pop-up calendars for simple "point-and-click" operation.

Choose to process monthly batch or daily usage processing to keep your MOU at your fingertips. CommSoft's drill-down ability allows you to analyze raw CDR records from summarized usage.

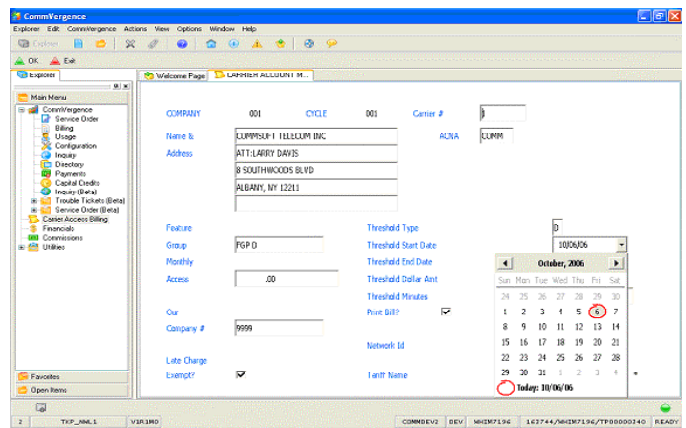

FLEXIBLE BILLING AND PAYMENT FEATURES

Mechanized billing, in accordance with SECABS requirements, is provided for, as well as the ability to provide bills in PDF (emailed) format, paper, or other required transmission formats.

Feature groups may be rated and billed in single or multiple bill/tariff structures and invoice scenarios. The system will automatically calculate rate splits, as well as prorates, on installs and disconnects.

All this flexibility is complemented by bill control processes and data entry tools that ensure procedural and data integrity.

API-DRIVEN, FUTURE-PROOF

Proven. Accurate. Limitless.

VALIDATION AND REPORTS

CABS offers NECA, MOU, and other reports critical to the monitoring of carrier access billing activity. There is a complete audit trail throughout the system that includes reports generated at billing. Data extracts and queries can be performed and used to analyze trends, to research anomalies, and for forecasting.

Numerous pre-formatted reports are provided, while additional forecasting and summary reports can be easily generated from raw switch data, including AMA and AUR records.

QUICK AND EFFICIENT IMPLEMENTATION

- 30-60 day implementation cycle
- Pre-loaded tables
- A/R conversion (historical conversion available)
- Interactive training
- Parallel Testing

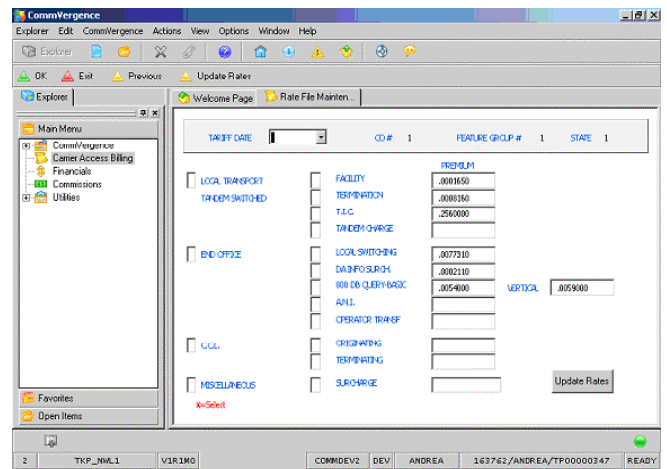

COMMSOFT CABS AT A GLANCE

- SECAB/MECAB compliant as established by the Ordering and Billing Forum (OBF)
- Pre-formatted Industry and Auditing reports, as well as Ad hoc reporting over the DB2 database.
- Fully document bi-annual software releases
- 30-60 day implementation services

USER COMMUNITY HELPS DRIVE DEVELOPMENT

In addition to the regulatory and market-based issues that make up our release schedules, customers are able to give input directly to our development team. Our Product Planning Committee (PPC) is comprised of employees and customers from various disciplines who request and vote on new features.

CommSoft holds annual user group meetings to showcase new products to our customers and to have our customers meet and talk to one another. It is one of the best tools we have for receiving first hand information to guide our products and processes.

Other Powerful CommSoft Products Include:

- CommForce:** Mobile Workforce Management
- CommNextion:** EBPP, Self-Care, and Self-Provisioning Portals
- CommView:** Real-Time Customer Service Dashboards

- CR&CM:** Customer Relationship & Campaign Management
- iCommVergence:** Customer Care, Management, Billing, and Rating
- Financials:** Financial, Material, and Vendor Management
